

Jahongir Kuziboev

Software Engineer | Mobile and Full-Stack Development

Tashkent, Uzbekistan | +998 90 347 3476 | admin@jaysonkhan.com
jaysonkhan.com | linkedin.com/in/jaysonkhan | t.me/JahongirKuziboev

Software engineer with a mobile development background and hands-on experience building web products and backend services. Currently at Consort Group, integrating AI and map features into Growz and Bizon. Founder of UzExam and creator of EduStats, with responsibility for Flutter clients, Django APIs, data workflows, deployment and ongoing product development.

Core stack: Python, Django, PostgreSQL, Redis, Flutter, Dart, REST APIs, WebSockets

Web and integrations: Django templates, HTMX, Alpine.js, Tailwind CSS, aiogram, Firebase, AI APIs

Engineering: Clean Architecture, BLoC/Cubit, Git, CI/CD, automated testing, Nginx, Unicorn

Experience

Consort Group LLC

Jun 2026 - Present

Mobile Developer | Growz and Bizon

- Develop Flutter features for Growz and Bizon, with current work focused on integrating AI into both mobile products.
- Build and improve map features and the mobile interfaces around them.

UzExam

Apr 2026 - Present

Founder and Mobile / Full-Stack Developer | Independent project

- Built and maintain seven Flutter apps for IELTS, Multilevel, SAT, DTM, Milliy sertifikat, Avtotest and interview preparation.
- Develop the shared mobile architecture, authentication, practice flows, progress tracking and subscriptions, together with the Django backend.
- Own product development, automated regression checks, deployment and ongoing support. Also created the independent EduStats education platform.

Soliq servis AJ

Jan 2026 - Apr 2026

Flutter Developer | TaxPay

- Built TaxPay, a mobile tax and payment application, using Flutter, Clean Architecture and BLoC.
- Implemented card binding, OTP verification, payments and transaction history; worked with backend developers on REST API contracts.
- Delivered the app to a production-ready stage. It was not publicly released after the department closed.

UIC Group

Sep 2023 - Dec 2025

Flutter Developer

- Developed corporate mobile applications for Android and iOS using Flutter, BLoC and Clean Architecture.
- Implemented REST integrations, local storage, media playback, payment interfaces and multilingual UI.
- Improved loading and responsiveness through caching, debugging and refactoring; contributed to code reviews, CI/CD and release preparation.
- Worked on AI Business Assistant, including assistant features, notifications and offline storage; coordinated mobile tasks and mentored developers.

Selected projects

UzExam web platform

uzexam.uz | Python, Django, PostgreSQL, Redis, aiogram

- Built the exam platform, mobile APIs and content administration tools, including adaptive question selection, spaced repetition and progress statistics.
- Integrated Telegram sign-in and a bot/Mini App; maintain multilingual pages, subscription workflows and server operations.

UzExam mobile apps

Flutter, Dart, BLoC/Cubit, Dio, Firebase

- IELTS and Multilevel: exam practice with reading, listening, writing and speaking workflows. SAT: mathematics and reading/writing preparation.
- DTM and Milliy sertifikat: subject-based entrance and national certificate preparation. Avtotest: driving theory practice. Intervyu: interview question practice.
- Maintain common authentication, networking and UI components across the apps, with shared checks and regression tests to keep behavior consistent.

EduStats

edustats.uz | Python, Django, education data

- Built a platform for exploring universities and schools in Uzbekistan, with institution profiles, reviews and education statistics.
- Implemented data import and aggregation, search and detail pages, Telegram authentication and localized sharing previews.

Additional project experience

Freelance Flutter development for a confidential client, Feb - Nov 2024. Built sports and fitness applications with adaptive interfaces, BLoC state management, local storage and release preparation.

Education

Tashkent University of Information Technologies | 2021 - 2026

Bachelor's degree in Software Engineering. Graduated in 2026.

GITA Academy | Android development with Kotlin | 2023

Awards

1st place, GITA national competition (2023), with a one-year study grant. 2nd place among 90+ teams, K-Lab Idea Hackathon (2024).
